Patient Care and COVID-19 for the Office of Dr. A. Michael Marasco

Under CDC guidelines during the COVID-19 recovery phase we will continue to follow best practices and current evidence to ensure the safest possible environment for our patients, families and staff.

Modifications have been made in scheduling and appointments continue to be staggered to ensure patient safety. Our absolute priority is the health and well-being of our patients, families, community and our staff as we continue to recover from the COVID-19 pandemic and variant health care status.

Note: Masks are required upon entering the office

- All patients are advised to use hand sanitizers upon entering and leaving the office
- Consistent with CDC guidance and government mandates, our practice requires all patients and individuals who enter the office to wear a mask that covers the mouth, nose and chin with no gaps between the mask and your face. ***The new guidelines re: masks do not apply to health care settings (hospitals, doctor offices, and long-term care facilities)***
- We have arranged our patient schedule to ensure safety for patients and staff and ask that you only bring an essential family member to your appointment if needed
- Do not bring food, water or any extraneous materials into the office
- Magazines have been removed until there is no longer a significant risk of cross contamination
- Dispose of any waste in the appropriate containers
- Do not place any personal belongings on counters in the treatment rooms
- If you or anyone you have been with has flu-like symptoms (coughing, sneezing, runny nose, fever) you will need to reschedule your appointment
