

To Our Patients -

Patient Care and COVID-19

Our absolute priority is the health and well-being of our patients, families, community and our staff. We have and will continue to monitor and respond to the rapidly evolving Coronavirus (COVID-19) situation in our communities and across the world.

We will continue to follow the guidelines of the Center for Disease Control (CDC), World Health Organization (WHO) and other local and national health agencies to support quality care and the safety of our patients.

Note the following precautions we have instituted in our office that will effect your visit.

- All patients must use hand sanitizers or disinfectant wipes upon entering and leaving the office
- We have arranged our patient schedule to provide adequate social distancing and ask that you only bring an essential family member to your appointment if needed
- Do not bring food, water or any extraneous materials into the office
- Magazines have been removed until there is no longer a significant risk of cross contamination
- Dispose of any waste in the appropriate containers
- Do not place any personal belongings on counters in the treatment rooms
- If you or anyone you are with has flu-like symptoms (coughing, sneezing, runny nose, fever) do not come to your appointment

If you have any questions or concerns regarding your care or about the above information contact a staff member who can direct your question for the most appropriate follow up.
